PROFESSIONAL SUMMARY

Results-driven Lead Developer with 10 years of experience building scalable, high-performance enterprise web applications using Angular, Node.js, TypeScript and Tailwind CSS. Proven track record of leading cross-functional Agile teams, architecting full-stack solutions within Nx monorepo workspaces and driving end-to-end performance optimization. Expertise in secure-by-design development (Veracode SAST/DAST, PGP/GPG encryption), CI/CD pipeline management via Azure DevOps and enterprise-level Angular framework upgrades. Active open-source contributor with 7 published VS Code extensions, 4 npm libraries, 5 Mobile games and AI-powered developer tools.

TECHNICAL SKILLS

Frontend	Angular, TypeScript, RxJS, HTML5, CSS3, Tailwind CSS, Angular Material, Bootstrap, Responsive Design, WCAG Accessibility
Backend	Node.js, Express.js, RESTful API Design, SQL, PostgreSQL
Testing	Jasmine, Karma, Unit Testing, Integration Testing, Test-Driven Development
DevOps & CI/CD	Azure DevOps, CI/CD Pipelines, Git, GitHub, Nx Monorepo Workspace
Security	Veracode (SAST/DAST), PGP/GPG File Encryption, Secure Coding Practices, Penetration Testing
Analytics	Google Tag Manager (GTM), Adobe Tag Manager, Google Analytics, New Relic
AI & Tooling	OpenAI GPT, Ollama LLM, Prompt Engineering, VS Code Extension Dev, Chrome Extension Dev, Apache Cordova
Methodologies	Agile, Scrum, Architecture Decision Records (ADR), Code Review, Technical Mentorship

WORK EXPERIENCE

Lead Developer | Epsilon *Aug 2021 – Present*

- Architected and led end-to-end development of Angular and Node.js enterprise applications within an Nx monorepo workspace, improving build performance by ~40% and reducing cross-team dependency conflicts.
- Led Angular framework upgrades (v8 through v21) across 3 production applications, reducing bundle sizes by 50–55% and improving Lighthouse performance scores from 60 to 85+.
- Designed and enforced an Architecture Decision Record (ADR) process adopted by 4 cross-functional teams, cutting developer onboarding time by approximately 50%.
- Implemented secure file encryption workflows using GPG/PGP across 2 enterprise data pipelines; documented processes and trained a team of 6 developers on secure-by-design practices.
- Worked on 20+ critical and customer facing applications in Veracode (SAST/DAST), achieving full security compliance for Monthly consecutive audit cycles.
- Led development of multiple brand modules within enterprise marketing platforms, delivering 100% on-time across 9 brands serving end users.
- Implemented analytics tagging strategies using Google Tag Manager (GTM) and Adobe Tag Manager, improving user behaviour tracking accuracy by ~95%.
- Drove responsive UI implementation across desktop and mobile for 20+ applications, reducing mobile bounce rates and achieving consistent cross-browser compatibility.
- Three-time nominee for the Magnitude Award for high-quality feature delivery, successful project launches and platform modernization leadership.

Technologies: Angular, Node.js, Nx Workspace, TypeScript, RxJS, Tailwind CSS, Bootstrap, Angular Material, HTML5, CSS3, SQL, PGP/GPG, Veracode SAST/DAST, GTM, Adobe Tag Manager, Azure DevOps

Professional 1 Software Engineer | DXC Technology *May 2020 – Aug 2021*

- Developed and shipped applications using Angular 8 and TypeScript, translating business requirements into responsive, accessible user interfaces ahead of sprint deadlines.
- Implemented responsive UI designs ensuring consistent cross-browser and cross-device user experience across desktop and mobile for enterprise client applications.

- Collaborated in an Agile Scrum team of 8 engineers, contributing to sprint planning, daily standups and bi-weekly retrospectives.

Technologies: Angular 8, Bootstrap, TypeScript, Angular Material, HTML5, CSS3

Senior Software Engineer | Mindtree *Sep 2019 – May 2020*

- Built various components using Angular 8 delivering responsive enterprise web interfaces, reducing UI defect rate by 20% through rigorous code reviews.
- Developed Node.js service layer components supporting REST API communication, improving backend data processing throughput for 2 client-facing applications.
- Received 'Hats Off' and 'A-Team' awards for technical excellence and adaptability across 3 concurrent project initiatives.

Technologies: Angular 8, Node.js, TypeScript, Angular Material, Bootstrap, HTML5, CSS3

System Engineer | Tata Consultancy Services *Jun 2016 – Sep 2019*

- Developed frontend components across Angular versions v4–v7 for 4 enterprise web applications serving clients including Boeing, delivering go-live milestones on schedule.
- Mentored and trained 10+ new engineers on Angular, HTML5, CSS3 and Bootstrap; created recorded training materials that reduced onboarding time by 3 weeks per cohort.
- Received 'Star of the Month', 'On the Spot' and 'Best Team' awards; recognized by Boeing IT Project Manager for successful project delivery and go-live execution.

Technologies: Angular v4–v7, TypeScript, HTML5, CSS3, Bootstrap, Angular Material, Kendo UI, JavaScript, React, ASP.NET MVC

KEY PROJECTS & OPEN-SOURCE CONTRIBUTIONS

AI-Powered Developer Tools

- PRPilot GPT: Built AI-powered pull request assistant using OpenAI GPT and prompt engineering that generates structured PR descriptions from git diffs; reduced PR documentation time by ~60% for development teams.
- AI Release Notes Generator: Full-stack app (Angular, Node.js, Express) that auto-generates structured release notes from Git commits and Azure DevOps pipelines using local Ollama LLM (privacy-first, no cloud dependencies).

npm Libraries (4 Published)

- SEAL (Scroll Effect Animation Library) – JavaScript animation library; upgrade-buddy – Node.js CLI for dependency management; structify-project – CLI for project structure visualization; branchname-validator – Git branch naming enforcement utility.

VS Code Extensions (7 Published)

- ngBoostY (Angular productivity), Snippet Sparks (code snippets), Log Master (debug log management), Sync Buddy (workspace config sync), Script Whiz (CLI utilities), Branch Name Validator, Misty Blue (theme). All available on VS Code Marketplace.

Mobile Games (5 Published)

- Neon Time-Loop Runner – (Mobile arcade runner game), Tricky Name Riddles – (Mobile puzzle game), Bubble Blaster – (Arcade-style), Asteroid Exploder – (Space-themed mobile arcade game), Mind Game - Match the Pair – (Memory-based mobile puzzle game). All available on Play Store.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering *2012 – 2016*

Jawaharlal Nehru Technological University, Hyderabad

Research Publications (2014–2015)

- "Editing Captured Key Framed Animation Based on Motion Warping" – ICCECE 2014
- "Security for Java Applets" – IJRITCC 2014 | "Click the Balls" – IJISET 2014 | "Rapid Ball" – IJIET 2015

CERTIFICATIONS

Google: Agile PM, UX Design Foundations, Dynamic UI, Mobile UX, Analytics	**IBM:** Penetration Testing & Cryptography, Web Dev, AI Fundamentals, Agile Explorer, PM Fundamentals
Microsoft: Fundamentals of UI/UX Design	**Cisco:** JavaScript Essentials, Intro to Cybersecurity
New Relic: New Relic Verified Foundation (NVF)	**PMI / CertiProf:** Scrum Foundation (SFPC), Basics of Scrum
